

Q) Why have I been sent PCR tests?

You have been sent 2 PCR tests in order to support the Event Research Programme gathering research on COVID-19.

Q) Why have I been sent 2 PCR tests?

There are 2 tests so you can take one test before the match (as close as possible to the match) and also one after the match (five days later).

Q) Will a positive PCR test result prevent me from being able to watch the match at Wembley?

No - in order to attend this event you will need to produce a negative LFD test. You have been asked to take and return by post the first PCR test as close as possible to the match (on Saturday 15 May) and one five days after the match in order to assist the programme's research. Should you receive a positive PCR test result even though you received a negative lateral flow (LFD) test result, you will be asked to adhere to national guidance following the positive PCR test. You may be asked to take further confirmatory tests as necessary.

Q) Why can I not take a PCR test at a local site, why do I have to use the PCR tests that have been posted to me?

The PCR tests that have been posted to you are identified and will be sequenced as part of the Events Research Programme.

Q) My PCR kits did not arrive directly to my home before the event – what do I do?

Go online to the [gov.uk](https://www.gov.uk/get-coronavirus-test) website (<https://www.gov.uk/get-coronavirus-test>) and order another one and take it as close as possible to the event day or 5 days after the event.

Q) I have more than one PCR kit at home, as I ordered one from the government website and then a pack of 2 PCR's also arrived, which one should I take?

Use the pack of 2 which arrived to your home directly from Test and Trace and take one on the day of the event and one 5 days after the event. In both cases use a royal mail priority postbox. Your nearest priority mailbox can be found at <https://www.royalmail.com/priority-postboxes>.

Q) There is not a priority postbox near me, can I post in a normal postbox?

No. You need to use one of the 35,000 Royal Mail priority postboxes, or arrange a free home collection by calling 119 (free from mobiles and landlines) in England, Wales and Northern Ireland. Or in Scotland call 0300 303 2713 (charged at your standard network rate). You can find your nearest priority postbox at <https://www.royalmail.com/priority-postboxes>.

Q) Can I attend the event if I live or work in an area currently identified/undergoing Covid 19 Surge Testing.

Yes; however, you will need to complete the testing regime to enable you to attend the event and any surge testing you have been invited to participate in.

Participation in surge testing does not exempt spectators from event testing. The event testing cannot replace testing as part of surge testing.

Q) Do I need to take the PCR tests to be allowed entry to the match?

No - in order to attend this event you will need to produce a negative LFD test.

You have been asked to take and return by post the first PCR test as close as possible to the match (on Saturday 15 May) and one five days after the match in order to assist the programme's research.
